Mike Roylance - Programming Assignment 3 - Ner

*How to compile and run your code

To compile my code, please type the following in the command line:

ruby ner.rb <seeds_file> <training_file> <test_file>

This will read the files and process the program!

* Which CADE machine you tested your program on
(this info may be useful to us if we have trouble running your program)

This was executed on lab1-2 (I produced the ner.trace here) under Ruby 1.8.7 (the default Ruby version)

* Any known bugs, problems, or limitations of your program

Currently there are no known bugs. If you'd like to see the web interface of this, please visit http://mikeapps.org !
